I normally don't take the time to write reviews. I keep an open mind and stay positive and avoid commenting. But this publication is extremely weak and poor on content. It is nothing less than a brochure with web links of YouTube etc. Any one can find internet links & YouTube videos for FREE !!! The cover graphics and the presentation are very misleading. The back cover states along list of what you will learn which is incorrect !! There is not enough literary content to teach you anything !! This is not a backyard guide for beginning farmers. In my opinion this is copy cut and paste slapped together attempt to sell an overpriced thing There is no guide here on resources to help you! You get MAYBE one general paragraph or FEW simple generic sentences on each of the subject areas highlighted in the table of contents followed by a web link. There is no how to approach or do it yourself format to help you. The total page content is under 61 pages with large font ! . Clearly this publication is a waste of money and is an insult to anyone wanting quality information on beginning farming ! ! . I would not recommend purchasing this book.
